LinkedIn: linkedin.com/in/vishvam-trivedi-90a08628a • GitHub: github.com/Vishu200672 • HuggingFace: huggingface.co/Vishu2006

SUMMARY

Fourth-year B.Tech CSE student (CGPA 8.62, expected graduation 2027) building and shipping ML systems end-to-end — from model training to public deployment. Delivered a computer vision model to Android achieving 94.2% accuracy across 26 classes with zero cloud dependency, and a semantic NLP matching engine live on a FastAPI microservice with Pearson $r = 0.97$ against human-labeled pairs. Comfortable owning a project from raw data to a working, publicly link-shareable product. SAP Certified. Seeking AI/ML engineering internships.

PROJECTS

Bovine Breed Recognizer

Jan 2026 – Apr 2026 | Team Project | PyTorch • ConvNeXt • Android (APK) • HuggingFace • OpenCV

- Fine-tuned ConvNeXt Nano in PyTorch to classify 26 Indian bovine breeds from 2,600+ images, achieving 94.2% accuracy on a held-out test split.
- Built a Canny edge detection + linear filtering preprocessing pipeline; accuracy held within ~1% across varied lighting and background conditions.
- Quantized and deployed the model as a ~30MB Android APK — on-device inference under 25 seconds, zero cloud dependency, field-ready for low-connectivity rural environments.
- Identified dataset size as the primary generalization constraint (2,600 images / 26 classes) and scoped augmentation + expanded data collection as the direct next step to harden real-world robustness.

SmartHire AI — Semantic Resume Matcher

Jun 2026 – Jul 2026 | Solo Project | FastAPI • Transformers • Pinecone • sentence-transformers • Streamlit • Python

- Fine-tuned all-MiniLM-L6-v2 on 127 resume-JD pairs across 41 roles — Pearson $r = 0.9733$, Spearman $\rho = 0.9604$, 98% strong-match and 100% mismatch detection, +9.4% gain over baseline.
- Deployed as a FastAPI microservice (12 REST endpoints) on HuggingFace Spaces with a Pinecone vector DB for persistent candidate storage — semantic matching, skill extraction, and embedding generation.
- Ranks 100 candidates in under 6 seconds on CPU: parsing → preprocessing → transformer embedding → cosine similarity scoring with skill-gap analysis.

GitHub: github.com/Vishu200672/SmartHire-AI • Live Demo

SmartHire Onboarding System

May 2026 – Jun 2026 | Solo Project | ABAP Cloud • SAP RAP • CDS Views • SAP BTP • Fiori UI

- Built a SAP RAP-based employee onboarding tracker using ABAP Cloud and CDS views, consolidating status and records into a single end-to-end Fiori dashboard — applied outside the core ML stack to demonstrate broader backend/enterprise systems range.

TECHNICAL SKILLS

Languages: Python (advanced), SQL, ABAP | ML & Deep Learning: PyTorch, TensorFlow, sentence-transformers, scikit-learn, BERT, Transformers, model fine-tuning, transfer learning, ConvNeXt, CNNs, model quantization

GenAI & NLP: LLM/NLP, local LLM deployment (Ollama), semantic similarity scoring, prompt engineering, Streamlit UI | Data & Pipelines: preprocessing, dataset management, feature extraction, image processing, Pandas, NumPy, Matplotlib, Seaborn

Vector DB & APIs: Pinecone, ChromaDB, FastAPI, REST API design | Tools & Infra: Git/GitHub, Linux, Jupyter, Android (APK) deployment, Docker (basic), Google Cloud (GCP)

Architecture: Software & application architecture, modular system design, microservices

HACKATHONS & ACHIEVEMENTS

- HackITM: Runner-up (Nov 2025)
- Odoo Hackathon: Advanced to the National Final among 847 teams, selected from 6,500+ teams across India; competed in the offline finale at Gandhinagar.
- Smart India Hackathon (SIH): Advanced via internal university hackathon (Selected among top <25 teams).
- ByteXL Build Summit x Chandigarh University 2026: Selected among the Top 10 teams nationwide from 600+ teams; competed in the grand finale.
- HackBaroda: Hackathon Participant

CERTIFICATIONS

- Generative AI for Software Developers — LinkedIn Learning | - Claude Code: Software Engineering with Generative AI Agents — Vanderbilt University
- Develop GenAI Apps with Gemini and Streamlit — Google | - SAP Certified Back-End Developer — ABAP Cloud (Valid Apr 2026 – Apr 2027, verify on Credly)

EDUCATION

Bachelor of Technology — Computer Science Engineering | ITM (SLS) Baroda University | 2023 – 2027 (Expected) | CGPA: 8.62
